

Hexadecimal Matrix Keypad

Farnell part 467-212 is the ECO 16250 06 hexadecimal matrix keypad (scan of manufacturer's datasheet appended). The keypad is a set of 16 normally-open membrane switches. The switches are connected together in rows and columns as per the schematic below (pins laid out as viewed from the key side of the unit).

The picture below shows the internals of the keypad, with the keys and membrane removed.
